What is a license?

A legal document that lets the copyright holder allow other people to use the copyrighted work and do things that would otherwise be an infringement of copyright.

Licensing can be done by the rights holder and can specify various conditions for the use of the copyrighted work. Usually, the rights holder retains all the rights, unless the license explicitly states otherwise.
This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement number 674939.

CESSDA Archives licenses

License

Licensing agreement

End user licence
A licensing agreement should cover:

Ownership/IPR

Legal issues

The rights and responsibilities of the archive and the depositor

Access conditions

Creative Commons

- nonprofit organization
- enables sharing through free legal tools
- easy-to-use copyright licenses
- “some rights reserved”
Creative Commons Licenses

This license lets others distribute, remix, tweak, and build upon your work, even commercially, as long as they credit you for the original creation. This is the most accommodating of licenses offered. Recommended for maximum dissemination and use of licensed materials.

This license lets others remix, tweak, and build upon your work even for commercial purposes, as long as they credit you and license their new creations under the identical terms. This license is often compared to “copyleft” free and open source software licenses. All new works based on yours will carry the same license, so any derivatives will also allow commercial use.

This license allows for redistribution, commercial and non-commercial, as long as it is passed along unchanged and in whole, with credit to you.

This license lets others remix, tweak, and build upon your work non-commercially, and although their new works must also acknowledge you and be non-commercial, they don’t have to license their derivative works on the same terms.

This license lets others remix, tweak, and build upon your work non-commercially, as long as they credit you and license their new creations under the identical terms.

This license is the most restrictive of our six main licenses, only allowing others to download your works and share them with others as long as they credit you, but they can't change them in any way or use them commercially.
Creative Commons Licenses

CC0 enables scientists, educators, artists and other creators and owners of copyright- or database-protected content to waive those interests in their works and thereby place them as completely as possible in the public domain, so that others may freely build upon, enhance and reuse the works for any purposes without restriction under copyright or database law.

Public Domain Mark enables works that are no longer restricted by copyright to be marked as such in a standard and simple way, making them easily discoverable and available to others. Many cultural heritage institutions including museums, libraries and other curators are knowledgeable about the copyright status of paintings, books and manuscripts, photographs and other works in their collections, many of which are old and no longer under copyright. The Public Domain Mark operates as a tag or a label, allowing institutions like those as well as others with such knowledge to communicate that a work is no longer restricted by copyright and can be freely used by others. The mark can also be an important source of information, allowing others to verify a work's copyright status and learn more about the work.

License Features
Your choices on this panel will update the other panels on this page.

- Allow adaptations of your work to be shared?
  - Yes
  - No
  - Yes, as long as others share alike

- Allow commercial uses of your work?
  - Yes
  - No

Selected License
Attribution 4.0 International

Help others attribute you!
This part is optional, but filling it out will add machine-readable metadata to the suggested HTML!

- Title of work:

- Attribute work to name

- Attribute work to URL

- Source work URL

- More permissions URL

- Format of work: Other / Multiple formats

- License mark: HTML+RDFa
